# 3 Semi Permanent Makeup

Microblading is an eyebrow tattooing technique, categorised under permanent makeup, but unlike traditional cosmetic tattooing, it is less invasive and is considered semi-permanent. Microblading typically lasts 1-3 years, depending on skin type and skincare routine. The procedure is done by using a hand tool with ultra fine needles and each 'hair' is gently etched into the skin, giving an incredibly natural and realistic look. Microblading can dramatically correct or fully reconstruct lost eyebrows and is excellent for those wanting to enhance their brows or who have little to no eyebrows, thinning brows from age or over tweezed brows. Pigments used are chosen to match the natural or desired brow colour and skin tone will also be taken into consideration. This pigment/ink is deposited into the superficial layers of the dermis and therefore fades more quickly, unlike permanent tattooing methods which deposit pigment deeper into the dermis.

**Patch Test required 24+ hours before treatment**

Microblading Consultation	Free
Microblading (Total cost for 2 Treatments) each 90 mins	£315
Microblading Colour Boost (0-6 months)	£145
Microblading Colour Boost ( 6-12 months)	£180
Microblading Colour Boost (12-18 months)	£250
Microblading Colour Boost (18+months)	£315

When 3 or more treatments are required please be advised that those will be charged at an extra cost

# 4 Advanced Aesthetics

We provide a wide range of non-surgical, injectable treatments designed to restore and enhance natural beauty, dissolve unwanted fatty tissue, restore hair growth, remove thread veins and boost your energy levels. Our aesthetics practitioner is medically trained and fully insured. We will plan your aesthetic journey with you and treatment times and frequency may vary Scan the QR code for "online bookings" to see the full price list and bookings. Please feel free to contact us with any questions.

# 5 Laser Hair Removal

Laser hair removal is the most effective method of hair removal available, permanently reducing hair growth by up to 90%, leaving you with smoother skin. Suitable for men and women and all skin tones, almost anywhere on the entire body can be treated, including sensitive areas such as the face and bikini line. Unlike other methods such as waxing, depilatory creams and shaving, laser hair removal gives long lasting results, without the ingrown hairs and irritation associated. The hair will also become finer and softer so it's less visible, and growth will slow down more with each treatment.

We are proud to say that at Therabeautic we use THE MOST ADVANCED ALEXANDRITE AND Nd:YAG BLENDED LASER, capable of treating all skin types and even help reduce finer, lighter hair.

The Cynosure Elite+ performs the largest range of hair reduction applications, as well as vascular, pigmentation and rejuvenation treatments – Find these under “Other Laser Treatments” for more information and prices.

**Laser Hair treatments will need a consultation and patch test 24+ hours before treatment and will be charged at £30 – fully redeemable against any course bookings**

Typically you will need 6-8 sessions – repeated every 8+weeks .
