

Client Consent for Microneedling Dermaroller & Dermafix

Name _____ DOB _____

Address _____

Email _____ Tel _____

This procedure causes mild trauma via small needles. It is moderately uncomfortable. Numbing cream may be applied to skin approximately 45 minutes before treatment begins.

Common side effects

- Redness & flushing
- Swelling & pain
- Tenderness & itching
- Some pinpoint bleeding

The skin may remain red and tender for up to 48 hours. Extremely rare side effects may include infections and ulceration.

I am 18 years or older, I am not pregnant or breast feeding.

I understand that the practice of medicine and surgery is not an exact science and therefore that no guarantee can be given as to the results of the treatment referred to in this document. I accept and understand that the goal of this treatment is improvement, not perfection, and that there is no guarantee that the anticipated results will be achieved.

The procedure for microneedling has been explained to me by the practitioner. I have read and understand the information given to me. I consent to undergo treatment.
